

# Secure Key Cabinets

Internal security is a consideration for small businesses, commercial premises and government departments. Being able to protect areas such as offices, data rooms and other items such as petty cash are essential to any business. There is no safer way to keep track of the many different keys required for these rooms and items than a secure key cabinet. Server Racks Australia manufacture a range of secure Government (SCEC) endorsed Class B and C key cabinets which provide extra security and peace of mind.

SRA provide a cost effective alternative to other key management systems and their hefty 5-figure price tags. SRA have an endorsed range of (SCEC) Class B and C secure key cabinet models that hold 20, 100 and 300 keys.

## Features include:

- Wall mounted.
- Tamper evident fully welded 2mm zinc anneal steel construction.
- Corrosion resistant.
- 6mm anti-drill plate.
- Recessed door with 2mm clearance between the door and the frame to resist crowbar attacks.
- The Class B Lock version is a Government SCEC endorsed TL11G with advanced digital security which can be fully auditable.
- The Class C Lock is a SCEC endorsed Bi-lock.
