## Class B Cabinets • Class C Cabinets • Class B & C Key Cabinets • Class B

SRA Solutions design and manufacture SCEC-approved cabinets complying with *Technical Specifications for Approved Security Containers*. These include (but are not limited to) Class B and C cabinets, key cabinets and wall mounted enclosures.

### Standard range

CLASS B + CLASS C

Our SCEC-approved standard product includes the largest range of cabinet heights including space saving half height, split, under desk and wall mount options.

*Accommodating simple cable installations and the deepest server or switch*

Standard heights: 12U, 18U, 21U, 24U, 30U, 36U, 39U, 42U, 45U, 48U

In your choice of depths: 650mm, 800mm, 1050mm, 1200mm

In both 600mm and 800mm widths

### Expanded range

CLASS B + CLASS C

To meet an ever-changing IT environment, we have widened our range with even more heights, depths and widths.

*Australia's most comprehensive SCEC-approved range*

Expanded heights: 27U, 33U, 47U

In your choice of depths: 700mm, 900mm, 1000mm, 1100mm

In both 700mm and 750mm widths

### Customised range

SRA engineering expertise extends to fully-customised SCEC cabinets and project management on any variations.

**Bespoke:** we welcome the opportunity to discuss your customisation—please call us today on (02) 6298 1855.

## SRA Solutions are an endorsed government supplier

*Proudly designed and engineered in Australia, our customers include government, defence, Australian Federal Police, Department of Immigration and Border Protection — along with BAE Systems, Thales, Boeing, Lockheed Martin, DCNS and CSC.*

## Key Cabinet • Class B plus Key-blister • Class B & C Wall Mount Cabinets

**SRA Solutions' SCEC-approved** Class B and Class C cabinets are of a steel-welded construction and include:

- superior design with the highest possible door-perforation and air flow volume
- a choice of doors: hi-flow vented, solid or window versions
- Class B security using digital Kaba X10 or S&G 2740B locks; Class C locks are BiLock
- high security side panels
- adjustable mounting rails, complete with laser etched RU identification
- earth-bonding kit
- full baying capability, with side panels on or off
- your choice of black or grey nurse colouring (other colours on request).

### iPAMM: High Density Heat Load, SCEC-Approved Solutions

SRA continues to provide iPAMM, a trusted and proven high density heat load solution, to fit all of our Class B and C cabinets, and is **the only SCEC-approved solution capable of dissipating up to 10kW of heat.**

*Patented intelligent plenum air management modules*

**SCEC iPAMM** + **SCEC iPAMM CELL**  
Up to 10kW dissipation      Greater than 10kW densities

**Cable Entry Points** Recent changes to the SCEC requirements have resulted in challenges to cable entry pathways and the volume of cables that can enter a cabinet. SRA Solutions has perfected a unique cable pathway methodology that meets these requirements while offering users a comprehensive and easy to install range of cable entry points, both flexible, adaptable, and upgradeable for increased capacity.

**Supply, install and manage** In addition to our range of SCEC-approved cabinets SRA Solutions is relied upon to provide installation, project management and turnkey solutions—**let's discuss your needs now: (02) 6298 1855.**
