

Crypto Container

C l a s s C

Overview

The Crypto Container from SRA Solutions is designed for secure storage of sensitive IT hardware within a commercial rack. The SCEC endorsed Class C rated container offers protection for your valuable assets, ensuring the highest level of security for your organisation's critical data and equipment.

Applications

The Crypto Container is an ideal solution for a wide range of applications, including but not limited to:

- Secure storage of cryptographic equipment
- Protection of sensitive IT equipment
- Data centres and server rooms
- Government and Defence facilities
- Critical infrastructure organisations
- Research and Development environments

Features and Benefits

SCEC Endorsed: The Crypto Container is SCEC (Security Construction and Equipment Committee) endorsed, attesting to its compliance with stringent security standards. This endorsement underlines its reliability and suitability for safeguarding sensitive IT hardware.

Commercial Rack Integration: Designed to seamlessly fit within standard 19" commercial racks, allowing secure and classified IT hardware to be stored within a commercial grade rack.

Robust Construction: Manufactured from durable materials, the Crypto Container is built to withstand physical attacks and environmental factors, ensuring the integrity of the stored hardware.

Specification
